What is your position on establishing liability protections for employers from frivolous lawsuits related to COVID-19?

I support protection for employers from any "frivolous" lawsuits, not just COVID-19. I believe we need to support our employers that provide jobs for the community.

What steps do you think the federal government needs to take to support small businesses throughout the pandemic and the economic recovery?

I am 100% opposed to all shut downs and government over reach during this or any other "flu" season. I believe the federal government needs to abide by the US Constitution and interfere less in our business, personal and religious operations. The statistics prove (only 6% of all "covid" deaths were from Covid only according to latest CDC statistics) this was a politically motivated shut down of our economy and should never be allowed to happen again.

What is your perspective on the best way to increase federal funding for infrastructure projects?

Cut the existing waste out of government spending and eliminate duplicate, redundant services/agencies.

What steps do you think Congress should take to address racism and inequality in our society?

The lack of political will to improve our own impoverished neighborhoods falls on the (democratic) elected officials in Louisville and each individual city. This is a local issue nationwide. I plan to lend a hand up in the West and South ends of Louisville. We need to increase education choice and opportunities. We must make sure our young people are properly educated and prepared to make a living when they graduate from high school. We need to add recreational facilities, preferably faith based, for the young people in the impoverished neighborhoods to teach sports and other healthy, constructive activities to build their character and life skills. I plan to use my office to initiate and encourage business and church participation in many projects to improve our poor neighborhoods. Inequality is a local issue and needs to be treated as such.

What steps do you think Congress should take to lower the unemployment rate?

OPEN AMERICA BACK UP!!!

Limit Governors abilities to shut down economies over a politically motivated, coordinated effort to influence a Presidential Election!

What is your plan to reduce health care costs for businesses?

Support the free market to create products and allow competition across state lines. Do not limit the health care options to Allopathic medicine only. Remove laws that limit Naturapathic Medicine, Osteopathic, Homeopathic, etc. Our system is limited and draconian in nature. Create a National Health Care Initiative to teach people about how to care for their health and increase their immune systems! Promote healthy lifestyles and provide health insurance products at lesser rates to reward those that work toward healthier habits. Teach other healing modalities in Health Classes in schools. Also, demand pricing transparency among all medical providers so people can make informed choice. Never, ever mandate any medical or biologic procedure(s).

What policies do you support to restore free international trade but ensure fairness?

I believe in America First and support the President's initiatives to make our trade more fair and equitable. I also believe we need to reward trading within our borders and most definitely manufacture products of national security and health here in America.

What changes, if any, would you support to the Tax Cuts and Jobs Act of 2017?

I would reinstate the ability to deduct 100% of entertaining and travel for any business reason as well as one family vacation per year. This would help boost a few of our hardest hit markets. I would add tax credits for landlords that would offer for sale by owner options to tenants that could otherwise not purchase a home. I would add/extend empowerment zones for business to be created in impoverished neighborhoods. I will support the Federal Tax Credit Tuition program. These are just a few.
